

Idle Medical Centre

Taking pride in being more

We're a friendly, forward-thinking practice over-looking the village of Idle. We have a traditional approach to general practice, striving to offer the best service to our patients wherever possible. We have innovated and adapted during the pandemic and utilise phone and video consultations on a day to day basis.

We strongly believe in supporting and investing in the practice team. Our ethos has always been to bring in the right people and build something better. If you think that might be you, then we'd love to hear from you
